

Revision of List of the plants and other objects subject to specific phytosanitary measures to be carried out in exporting countries (Annexed Table 1-2 of the Ordinance for Enforcement of the Plant Protection Act) and the details of the requirements for each of the quarantine pests

Note: The list will be revised as follows. Underlined regions/countries are the main changes in the revision.

Common requirements

The plants and other objects must be accompanied by a phytosanitary certificate or a certified copy of the phytosanitary certificate issued by the NPPO of an exporting country to certify that the plants and other objects have been inspected and are considered to meet the requirements.

Item No.	Region/countries	Plants/other objects	Quarantine pests	Requirements
1	[Middle East] Israel, Iran, Turkey, [Europe] Italy, Cyprus, Greece, Switzerland, Spain, Slovakia, Selvia, Czech, Hungary, France, Portugal, Malta, [Africa] Algeria, Egypt, Canary Islands, Tunisia, Morocco	Live plants and plant parts for planting (excluding seeds, fruits and live plants and plant parts that are aseptically cultured, sealed in test tubes, flasks, etc., and imported being free from the quarantine pest) and cut flowers and branches and leaves, leafy vegetables for consumption and ornament of the following plants: celery (<i>Apium graveolens</i> (including <i>Apium graveolens</i> var. <i>graveolens</i> , <i>Apium graveolens</i> var. <i>dulce</i> , <i>Apium graveolens</i> var. <i>rapaceum</i>), <i>Ambrosia artemisiifolia</i> (including <i>Ambrosia artemisiifolia</i> var. <i>elatio</i>), <i>Daucus</i>	<i>Bactericera trigonica</i>	<p>The plants must fulfill the following specific requirement AND the phytosanitary certificate or the certified copy of the phytosanitary certificate must include additional declaration (see “<i>Example of wording for additional declaration</i>”).</p> <p>The plants are found to be free from <i>Bactericera trigonica</i> by inspection prior to export. The inspection should be carried out to determine if eggs are not present externally on the leaves and larvae and adults feed externally on the leaves are not present. If <i>Bactericera trigonica</i> is detected through the inspection, the plants are subjected to an appropriate treatment aiming at eradicating this pest. Details of treatment schedule should be mentioned on the phytosanitary certificate under the heading "Disinfestation and/or Disinfection Treatments" with the date of the treatment stated.</p> <p>Example of wording for additional declaration: <i>Fulfills item 1 of the Annexed Table 1-2 of the Ordinance for Enforcement of the Plant Protection Act (MAF Ordinance</i></p>
